Student Name: Peddireddy Madhavi

Reg. No.: 192372133

Course Code: CSA1305

Slot: D

Course Name: INTERNET PROGRAMMING

Course Faculty: Dr. D.Sudhakaran

Project Title: Student Skills Development management system

Photographs: (2 photographs –Module photo contribution module work in the project and presentation image)

The left screenshot displays the 'Student Registration' form. It includes fields for 'Full Name' (ganeswari), 'Register Number' (192372133), 'Email address' (ganeswari2183.sse@saveetha.com), 'Department' (CSE-AI), 'Year' (4), 'Semester' (07), 'Password', and 'Confirm Password'. A 'Register Account' button is at the bottom, along with a link for users who already have an account.

The right screenshot shows the 'My Skills' dashboard. It features a sidebar with navigation options: Dashboard, My Profile, My Skills, Skill Assessment, Learning Courses, Recommendations, Progress, Achievements, and Reports. The main area displays progress bars for various skills: SQL (53% progress, 'In Progress' status), Artificial Intelligence (100% progress, 'Completed' status), Data Structures (22% progress, 'Not Started' status), Machine Learning (80% progress, 'Not Started' status), Cloud Computing (42% progress, 'Not Started' status), and Time Management (45% progress, 'Not Started' status). Each skill card also shows 'Current' and 'Target' levels and a 'Add New Skill' button.

Output

Project Description: (here you write what you did in this project (contribution) including Model Description)

The ****Student Skills Development Management System**** is a comprehensive, web-based platform designed to bridge the gap between academic learning and industry requirements. Its primary objective is to empower students to systematically identify, track, and enhance their technical and soft skills to align with their desired career goals, such as Software Development, Data Science, or AI Engineering. By providing a centralized, interactive dashboard, the system allows students to take full ownership of their professional development. Students can maintain personalized profiles, log their progress in various learning courses, and visualize their growing skill sets through intuitive charts and analytics. To keep students engaged and motivated, the system features built-in skill assessments across multiple difficulty levels, rewarding successful completions with gamified achievements and badges. Additionally, it can generate detailed, printable reports that summarize a student's entire skill profile, making it a highly valuable tool for placement preparations, resume building, and academic review by administrators. Built on a modern and scalable technology stack, the backend is powered by Python and FastAPI to ensure rapid, secure API responses, while MongoDB serves as a flexible NoSQL database for managing

complex student profiles and analytics. The frontend is crafted using HTML, Vanilla CSS, Bootstrap, and JavaScript.
